Please find below and/or attached an Office communication concerning this application or proceeding.

## DETAILED ACTION

1. This action is responsive to communications: Application filed on 9/11/00.
2. Claims 1 – 42 are pending in the case. Claims 1, 12, 15, 26, 29, and 40 are independent.

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 11, 15 – 25, and 29 – 39, drawn to Group I, classified in class 715, subclass 531.
  - II. Claims 12 – 17, 26 – 28, and 40 – 42, drawn to Group II, classified in class 345, subclass 739.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not need to search a repository over a network. The subcombination has separate utility such as updating a shared repository over a network.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
